

## 4 Joint Specifications

### 4-5 Marking of Joints for Titanium Carbide Coated Foil

For efficiency during the formation process and slitting process at the customer's site, colored tape is used within rolls to mark the location of joints.

Item	Joint Markings
Titanium Carbide Coated Foil	 <p>The diagram illustrates a roll of Titanium Carbide Coated Foil on the left. A section of the foil is unrolled to the right, showing a joint. The joint is marked with a red tape, which is labeled "Red tape". The joint area is shaded gray and labeled "Joint".</p>
